

Zahl Limbuwala has been appointed as the Executive Chairman of the Advisory Board at maincubes

Frankfurt, December 12, 2023 – Zahl Limbuwala has been announced as Executive Chairman of the Advisory Board of maincubes. The company operates data centers with a focus on highest security, quality and sustainability in Frankfurt and Amsterdam and will soon put another data center into operation in Berlin. maincubes intends to invest more than one billion euros in the construction of new data centers in the coming years. The appointment of Zahl underlines maincubes' efforts to further expand its market position and become one of the leading European data center providers.

Zahl has more than thirty years of industry-relevant expertise, most recently as Chief Operating Officer of AtlasEdge Data Centres, one of Europe's key operators of edge data center infrastructure. Prior to that, he was responsible for strategy and strategic client engagement at CBRE's data center business unit, which managed over five hundred data centers globally. He is currently Operating Partner of DTCP, the majority owner of maincubes. Zahl will primarily support the company and its management team in scaling up significantly to meet client demand. He will also support the business with international clients with access to an extensive global network including from his time living and working in the USA.

Oliver Menzel, CEO of maincubes, expresses: "We are pleased to welcome Zahl. With his experience in the digital infrastructure and technology sector, Zahl brings profound industry knowledge and an entrepreneurial background, making him an ideal fit for the role of Executive Chairman. We are confident that his engagement will further strengthen our market position and will help us to establish ourselves as a leading platform for data center services in Europe."

Zahl Limbuwala adds: "I am convinced that maincubes, with its modern, highly secure data centers, will benefit significantly from the increasing need for digital infrastructure and the emergence of AI applications driving previously unimaginable demand for data center capacity. I look forward to supporting Oliver and his team and contributing to the success of maincubes."
