Am Kronberger Hang, 65284 Schwalbach am Taunus,

that in the period from January 1, 2023 to December 31, 2023, electricity from renewable energy sources was generated and fed into the public electricity grid in the amount of 37,113,000 kWh of its total electricity consumption. The enexion-certified green electricity supply is guaranteed within the European Energy Certificate System, which is recognized throughout Europe.

Guarantees of origin issued in accordance with Article 15 of Directive 2009/28/EC of 23 April 2009 and Article 19 of the amended Directive 2018/2001 of the European Parliament and of the Council of 11 December 2018 on the promotion of the use of energy from renewable sources guarantee the origin of the electricity from renewable sources and rule out double counting. Documentation, transparency and security are ensured in Germany by the Federal Environment Agency's register of guarantees of origin.

The special commitment of maincubes Holding & Service GmbH to the progress of the European energy transition beyond the efforts of public authorities is hereby confirmed.

A well thought-out, sustainable energy supply (smart greening) is a fundamental component of the corporate strategy. As part of this social commitment, maincubes Holding & Service GmbH has opted for green electricity of a particularly high quality:

To qualitatively support and accelerate the European energy transition, only guarantees of origin from climate-neutral generation plants certified according to the RenewablePLUS criteria catalog were used.

maincubes Holding & Service GmbH makes an important contribution to climate protection by saving approx. 13,991,601 kg of CO₂ per year compared to the German electricity mix in accordance with § 42 EnWG.

enexion confirms maincubes Holding & Service GmbH's extraordinary commitment to protecting the environment and emphasizes its assumption of this important role model function.
